New: SIS 9.1 Release and Service Release

# New: Cadcorp Training

Upgrading to Cadcorp SIS Desktop 9.1

Duration: 1 day

This course introduces students to Cadcorp SIS Desktop 9.1. It provides hands-on insight into the new interface, concepts and features that are available in this software release. Students will be able to test the new functionality and explore some of the practical benefits of upgrading to this release.

New: EPC Data Service

October 4, 2023

Cadcorp launches new EPC Data Service

Cadcorp has launched a new cloud hosted data service, providing Energy Performance Certificate (EPC) ratings for residential properties in Great Britain. The announcement was made at the recently held Cadcorp Land and Property Conference.
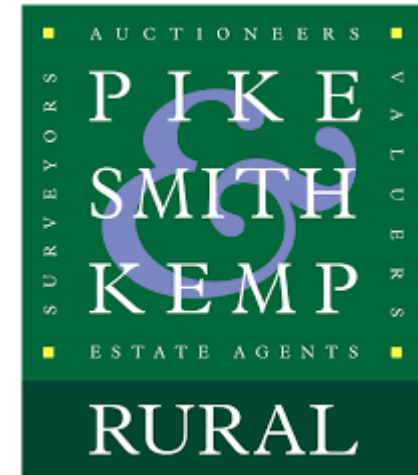

Easy access to EPC data significantly benefits many industry sectors including government, land and property, emergency services, environment, and finance. Integrating EPC data with a Geographic Information System (GIS) plays an essential part in enabling organisations to identify properties that meet specific EPC ratings.

Cloud Migrations

G-Cloud 13

Cadcorp expands cloud options for desktop GIS, web mapping and spatial data in G-Cloud 13

Cadcorp has been awarded a place under G-Cloud 13 as a supplier of GIS, web mapping and data services.

The British geospatial technology company offers the following GIS software and services in the cloud: Cadcorp SIS Desktop, SIS WebMap, SIS Notice Board™, Spatial Database Service and Map and Data Service.

Cadcorp has included the recently released Cadcorp Data Service as part of its expanding G-Cloud services. The managed service provides direct access to a wide range of open data directly from a secure Cadcorp datastore. The service allows customers to easily access data overlays within SIS Desktop and SIS WebMap. It provides a central location for numerous datasets from multiple organisations. Open data suppliers include: British Geological Survey; Department for Levelling Up, Housing and Communities; Environment Agency; Historic England; Natural England; and Ordnance Survey®. As part of the cloud service, Cadcorp keeps the datastore updated and plans to add additional datasets and data suppliers.

Extended Support & Managed Service

GIS user or administrator support that goes beyond "normal" helpdesk support.

- **SIS Desktop**
  - Analysis: Routing, data cleansing
  - Python scripting
- **Database**
  - Database upgrades
  - Loading data
  - One off tasks: dropping database tables, creating indexes, creating unique ID's, adding new users, adding date/time field,

- **SIS WebMap & GeognoSIS**
  - Software upgrades
  - Local Knowledge / FindIT configuration
  - Configuring web services (WMS, WFS, WMTS)
- **General**
  - Knowledge transfer/hand holding
  - Implementation review/ Health check
  - License server upgrades
