

What to expect from the next generation of web mapping

Multiple maps, for multiple uses

Create information-rich maps to support a range of activities

Access the latest Ordnance Survey® data products

Integrate easily with OS APIs and the recently released OS NGD

Cloud accessible

Browser independent

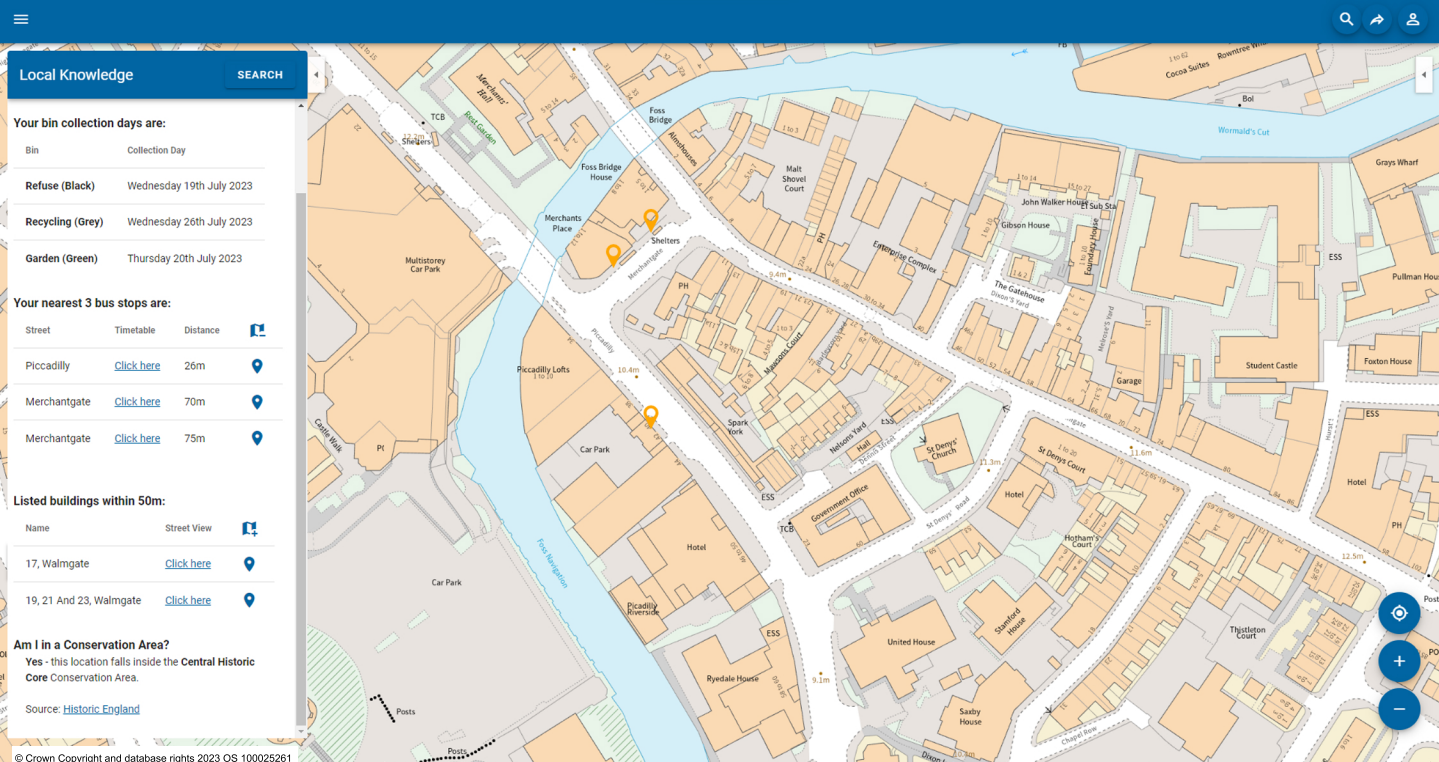

New, yet familiar user interface based on Google Material Design

Extended mobile integration for web mapping on the go

Advanced GIS functionality made simple for the end-user

User-friendly admin of internal and public access maps, including embedded maps

Hosting options using the latest cloud architecture and spatial data support

Local Knowledge SEARCH
