# iManage Cloud

Manage your LLPG / LSG in the cloud  
with iManage Cloud

Save time and better manage your Local Land and Property Gazetteer (LLPG) and Local Street Gazetteer (LSG) with our fully cloud-based, wizard-driven Gazetteer Management System (GMS), iManage Cloud.

## Intuitive, wizard-driven gazetteer management software

**iManage Cloud** uses the Aligned Assets platform to deliver a fully cloud-based solution that streamlines the creation and management of properties and streets to the British Standard BS7666, complete with Unique Property Reference Numbers (UPRN) and Unique Street Reference Numbers (USRN). Using the latest technology and standards, our feature-rich GMS enables end-to-end integration and improved automation of processes, driving increased efficiency and optimising accuracy.

Driven by the ever-evolving needs of our customers, iManage Cloud has been developed to deliver the most advanced, user-friendly, fully cloud-based GMS available.

## Why migrate your LLPG / LSG to the cloud?

iManage Cloud helps maximise cost and time savings by eliminating the need for costly servers and internal IT effort. The APIs that form part of the solution allow the multi-directional flow of data to and from the LLPG / LSG, saving users more time, eliminating manual error, and improving collaboration.

## Drive efficiency with our gazetteer management software

### Efficient installation

Get up and running quickly as our GMS is **quick to install** with minimal bespoke code and integrates seamlessly with other operational systems.

### Wizard-driven processes

Create, edit and maintain street and property addresses singularly or in bulk with our intuitive, **wizard-driven platform** to maximise efficiency and productivity.

#### Accuracy and compliance

Achieve accuracy and **compliance with GeoPlace and One Scotland standards** through automated address validation on entry; and use the latest standard Data Transfer Format (DTF) files for import/export.

#### Create templates

Save time and ensure consistency by producing easy-to-use **templates for property and street creation**.

#### Real-time address search

Instantly search **real-time address updates and records** using the Address Search APIs, ensuring the most accurate data is accessed from any system integrated with the LLPG / LSG.

#### Browser-based, secure and scalable

Accessed from anywhere with an internet connection, our GMS is safe and secure to use. Fully scalable, it can be applied to a single local authority or scaled to accommodate complex shared services, such as unitaries, allowing data segregation as required.

#### Enriched location data

Our solution enables councils to share and utilise the UPRNs to link multiple datasets, providing richer insight into locations and communities, enabling improved delivery of services.

#### Integrate street naming and numbering

Integrate our Street Naming and Numbering (SNN) Management System to **standardise and automate SNN processes** while ensuring you're using the latest data.

## Requires zero maintenance

Save on extensive hardware, energy and maintenance costs by managing your LLPG / LSG in the cloud. Fully supported, maintained and updated by Idox, council IT resources can be reallocated to other vital project work.

## Additional modules to enhance functionality

To maximise capability and outcomes, iManage Cloud integrates seamlessly with all our **additional modules**, including **matching and cleansing**, rapid **address search APIs** and our **street naming and numbering management system**.

## Secure cloud solution for local authorities

With digital transformation at the heart of local government strategy, we are here to help you step into the cloud. Working with local authorities for over 30 years, we have developed a deep knowledge and understanding of how they work. This experience, combined with the consistent feedback we proactively seek out on your specific requirements, enables us to develop the solutions you need to enable optimum efficiency in your work. We know budgets are tight so by streamlining functionality and workflows, we can boost productivity while saving you money.

Migrate to iManage Cloud for the most cutting-edge, fully cloud-based LLPG / LSG GMS solution available, driving time and cost efficiencies, improved delivery of services and enriched insight into any location.
